**(54) METHOD FOR ADHERING FLUORORUBBER TO
SILICONE RUBBER**

(57) Abstract:

PURPOSE: To improve the adhesion of a fluororubber to a silicone rubber by treating the surface of the vulcanized fluororubber with a specific compound and subsequently vulcanization-adhering a silicone rubber to the treated fluororubber.

CONSTITUTION: The surface of a vulcanized fluororubber is treated with an amino group-containing trialkoxysilane compound [e.g. γ -aminopropyltriethoxysilane or N- β -(aminoethyl)- γ -aminopropyltrimethoxysilane] and subsequently vulcanization-adhered to a silicone rubber.
